Products and Solutions for Assembly

X-PAQ™
PRECISION | ACCURACY | QUALITY

| About ASG

We are personally committed to understanding and exceeding our customers' requirements. We are committed to continuously improving our products and processes.

We are dedicated to delivering products, services, and solutions on time and at a competitive value.

ASG, Division of Jergens, Inc. is an ISO 9001:2008 certified manufacturer, distributor and service center for products and solutions focused around threaded assembly. Since the 1970s, we have developed a first-class reputation unrivaled in the industry offering a wide range of world class products.

We offer a wide selection of ASG brand products including torque control, error-proofing and process control products, digital calibration equipment, X-PAQ™ precision fastening systems, production aides and assembly workstation accessories. ASG is proud to be a long-time U.S. Premier Distributor of HIOS® electric torque control screwdrivers and accessories, and the exclusive North American Master Distributor of Fiam® air tools.

ASG also offers a selection of value-added products and solutions including engineering and consulting services, financing, and extended protection and maintenance plans.

Industry Commitment

ASG is committed to the highest quality standards, ensuring that all processes and procedures are followed to produce the best products for our customers. We maintain ISO 9001:2008 certification for the manufacture, distribution, and service of assembly tools. Maintaining membership in key industry organizations in order to stay abreast of the most current industry trends and information is vital to serving our customers.

| About X-PAQ™

ASG introduced the X-PAQ™ transducerized, torque/angle control brushless DC tools in 2010. The focus of this product line is to offer an affordable precision torque control and data management system with intuitive, user friendly programming. This coupled with ASG’s reputation for being “easy to do business with” and a strong capable distribution network has made the X-PAQ™ very successful.

| Precision Fastening Product Group Controlled Performance

The ASG Precision Fastening product group fills the needs of manufacturers requiring tight tolerances, high levels of error-proofing and traceability. Our line of transducerized DC electric torque control screwdrivers and nutrunners work with X-PAQ™ controllers for applications covering a torque range from 1 to 309.8 lbf.in (0.1 to 35 N.m) across the full range of products.

| Section 1: X-PAQ™ Controller for SD2500 Series Tools

X-PAQ™ SD2500 controller features a large, color touch screen for intuitive setup, eliminating the need for external software. A variety of integration options are possible.

- Torque and angle control monitoring with color coded results
- 32 task storage keys for multiple assembly setups with 8 available parameters within each task
- Easily import/export task files with USB drive
- Multi-bolt programmable fastening
- Programmable I/O for process control
- Parameter status bar
- Data collection and rundown graphing
- Automatic tool recognition
- Selectable tool triggering and trigger sensitivity control
- Password protection for 3 users
- Universal power supply (international power cords available)

Run Tool Screen

Torque Rundown Parameter

| X-PAQ™ Controller for SD2500 Series Tools

Task Menu

- 32 available tasks

- Nameable tasks for easy selection and recognition
- Task file export to USB

Inputs

- 8 available 24 VDC opto-isolated inputs
- Assignable inputs for each command. No dedicated channels
- Binary combination compatible

Outputs

- 8 available mechanical dry-contact relay outputs
- Programmable outputs
- Most output durations may be set. Trigger and threshold outputs are only available in solid mode

Graphing Data

- On screen graphing capability for joint evaluation
- Graph data points export to USB possible during rundown

- Last 100 rundown data viewable on screen with larger data sample downloadable to USB in .csv format

Password Protection

- 3 programmable access passwords to prevent unintended access by production line operators
- All passwords have the same access, the controller is either locked or unlocked
- Reset button on 'Run Tool' screen may even be enabled or disabled when the controller is locked

| SD2500 Screwdrivers and Nutrunners

Sleek, compact and durable, the SD2500 is the ultimate lightweight tool for transducerized precision fastening.

SD2500 screwdrivers and nutrunners are premium quality transducerized DC electric tools. Inline screwdrivers are available with push, lever or remote start operation and 1/4 in. hex drive. Fixture mount models with threaded end are available in each torque range for automated or robotic applications. Right angle nutrunners are available with either 1/4 in. hex or 1/4 in. square drive.

- Transducerized torque and angle control with compact, lightweight, brushless motor for unparalleled clean, quiet and accurate operation
- Sleek aluminum body with high intensity LED tool indicator lights
- Foam grip included is standard with all inline models to provide ergonomic comfort for the operator

Purchase a System or Configure Your Own

ASG offers the X-PAQ™ SD2500 as both pre-packaged systems (in the U.S., Canada, and Mexico only) and individually sold items.

Systems are available with each tool as follows:

- **Complete X-PAQ™ System:** includes X-PAQ™ controller, SD2500 tool and 10ft (3m) heavy weight strain relief tool cable. To determine the model number for a complete system: add '-SY' to the SD2500 tool model number.
Example: ASG-SD2500-10PL-SY
- **X-PAQ™ System without Tool Cable:** includes X-PAQ™ controller and SD2500 tool. To determine the model number for a system without the tool cable: add '-SY-NC' to the SD2500 tool model number. Customers may then order their preferred cable separately.
Example: ASG-SD2500-10PL-SY-NC

Easy robotic integration with a vacuum pick-up option.

| SD2500 Sequence Recognition System

Every SR system must be specified according to custom application requirements.

The sequence recognition system is the solution for applications such as those requiring uniform compression of all components within your product assembly. The ASG SRS ensures that the operator installs fasteners in a specific pre-programmed sequence.

- Integrate with the ASG X-PAQ™ Precision Fastening System to help control manufacturing processes by ensuring that proper torque, sequence and revolution tolerance is achieved
- Provides feedback to disable or enable the handheld tool based upon preprogrammed characteristics for proper fastener tightening sequence

Model Number	Typical SRS Components
ASG-SRS-SY	Standard Infra Red Vision Camera & Software, Basic PLC Program, I/O Cable, Ethernet Cable, 24VDC Power Supply, PLC & Power Supply Enclosure

Key Features and Information

Infrared Camera Technology: The IR camera detects the position of the tool, monitors fastener tightening sequence and minimizes the effects of workstation lighting on the assembly process.

Multiple Assembly Sequence Storage Capability: Provides outstanding process flexibility for multiple assemblies at a single workstation (high mix/low volume).

Tight Center to Center Distances: Allows the ability to distinguish between fasteners with 0.25 in. (6.35 mm) center to center distances and greater.

*Subject to application analysis

Workstation Controls Integration Capability: Allows further process control using workstation clamping, signal lights, bar code readers, etc.

Single Sensor Mounted High above Operator Work Envelope: Similar products incorporate several sensors mounted along the torque arm. The SRS single sensor mounted outside the operator work envelope eliminates the risk of accidental damage and wear and tear due to exposure to operator movement.

Example: Incorporating the SRS in Assembly

Visit our website,
www.asg-jergens.com
and submit your
application analysis to
begin the quote process.

Step 1: Part is inserted into workstation fixture (clamps close).

Step 2: Fasteners are tightened to 1 N.m at 4 locations.

Step 3: Batch complete signals finished part (clamps open).
